- · Search option for quick topic search

#### Track + React

Track + React is an app developed by the Arthritis Foundation that tracks many aspects of your daily living. You can track:

- Your nutrition
- Your fitness
- Your sleep
- Your medications
- Your mood
- Your day
- Your symptoms

In addition, it allows you to compare your arthritis pain to its Arthritis Impact graph. Its goal is to determine which activities may be impacting your documented pain. The data you input is secure and confidential. It is a helpful tool in identify trends over time on the graph and you can even use its web application to share the information with your primary physician or print for your own records. To document pain level, there is a slide bar to rate it from 1 to 10. You also can rate your stiffness level. It offers a goal setting option.

There is advice and tips from the healthcare experts at the Arthritis Foundation. This is a free app to download for your Android.
